ENTERPRISE AI AUTOMATION PLATFORM

Alli Activate. Move while the moment is open.

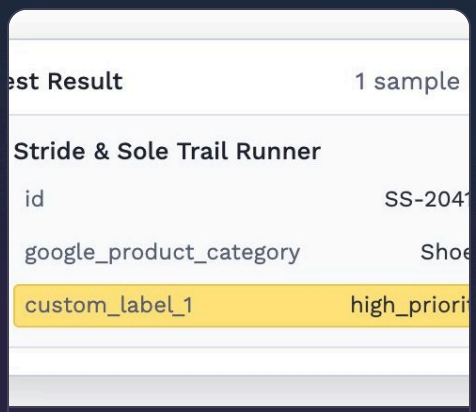

Alli Activate is the enterprise AI automation platform inside Alli, PMG's operating system for business transformation. Six products turn decisions into action: workflows built from a prompt, creative produced at scale, product feeds kept current on every channel, an AI workspace on every desktop, apps your teams and clients use, and governed access for AI agents, all on the same data as the rest of Alli.

WHY IT MATTERS

Why does connected execution matter?

01

Faster response

Scheduled workflows check performance and start reviews without someone watching every dashboard.

02

Creative at volume

Versioning and localization move faster, and brand teams still sign off.

03

AI that compounds

Every skill, workflow, and app becomes something the next person builds on.

04

Agent-ready access

AI assistants work with Alli data through governed, permissioned connections.

See what your business can do when execution keeps pace with strategy
