ALLI4U · ENTERPRISE AI WORKSPACE

The enterprise AI workspace for every desktop

Alli4u is the enterprise AI workspace that puts a secure AI coding assistant on every desktop in your organization. Each person gets the models they're enabled for, usage tracked at the individual level, a shared library of automation skills, and ready-made connections to Alli, Google, Slack, and Meta, so AI becomes part of how work gets done.

ALLI BY PMG

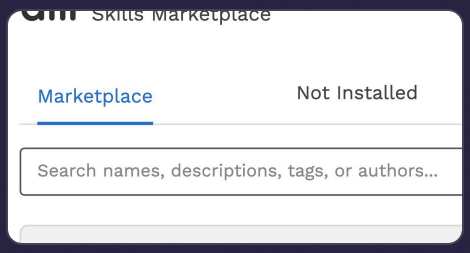

15+
years in production, running strategy, data, and marketing for the world's largest brands

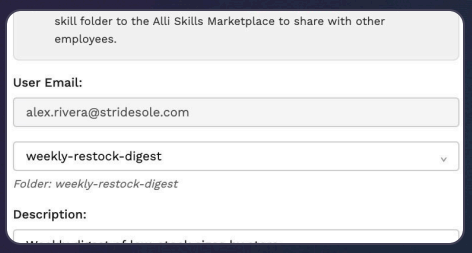

100%
of PMG clients use Alli, with no separate client version

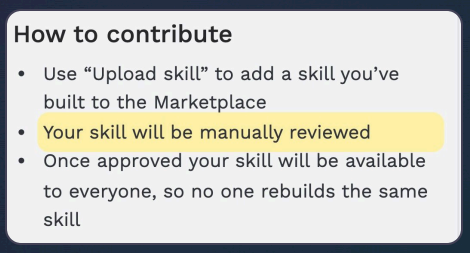

SOC 2
Type II report held by the Alli platform, aligned with the NIST Cybersecurity Framework

WHAT ALLI4U DOES

AI on every desktop, with skills that compound

AI ON EVERY DESKTOP

AI as a default tool for every user

Alli4u puts an AI workspace on every desktop.

SKILLS THAT COMPOUND

Install a skill in one click, or publish your own

Browse skills built across PMG, install the ones you need, and publish what works for the team to run.

VAULT-GRADE SECURITY

Secrets locked down, skills reviewed

API keys, tokens, and secrets sync from a secure vault, so credentials aren’t pasted into chats or stored on laptops.

WHAT CHANGES

What changes when your organization works in Alli4u

01

AI reaches every team

Models are enabled for every team beyond your specialists, and people start with pre-built skills tied to their daily work.

02

Cost you can see

Token usage is tracked person by person and team by team, so leaders can justify expanding access and see where AI is producing value.

03

A yes from security

Credentials live in a managed vault, configurations stay separated by customer, and every shared skill is reviewed first.

04

Work that builds on itself

Every automation someone publishes becomes a skill the next person can install, so the organization’s AI capability grows with each problem solved.

AI on every desktop. In every workflow.

Book an intro and we’ll show you how Alli4u rolls out to a team, what they can build in the first week, and how you’ll track it.
